Protective Design Center

1 November 2015

Dear Sir or Madam:

A course entitled "Security Engineering" is being offered 1-5 February 2016, at Humphreys Engineer Center near Springfield, Virginia. It is presented by the Corps of Engineers Protective Design Mandatory Center of Expertise. The cost of the course is \$1,200, which includes recently updated criteria and electronic reference materials. Due to these updates, the course duration has grown, with classes starting at 8:00 a.m. and concluding at approximately 5:00 p.m. Monday through Thursday and approximately 2:00 p.m. on Friday. Student travel and per diem costs are not included.

The course addresses an interdisciplinary group on the joint development of design criteria and protective measures to mitigate criminal and terrorist threats to assets using DoD and Interagency Security Committee standards. The target audience includes individuals responsible for facility planning and security, including: engineers, planners, designers, law enforcement and provost marshal/security personnel, and antiterrorism officers. The class will prepare students to more effectively implement new force protection/antiterrorism directives and regulations. The course also addresses developing and improving communication between the security, antiterrorism, and engineering communities.

Registration information, a course synopsis, and an application form are enclosed. Please read all the information on the registration information sheet. Once payment is received, a confirmation letter, including directions, a partial list of area hotels, and course information will be sent to the student. Payment deadlines are listed on the registration information sheet.

For registration or additional information, please contact Ms. Katherine Barnett at (402) 995-2393, or by e-mail at katherine.d.barnett@usace.army.mil.

Sincerely,

A handwritten signature in black ink, appearing to read "C. Betts".

Curt P. Betts, P.E.
